

**Effective Date:** 12 December 2019

## Purpose

It is the policy of E&E Waste Pty Ltd (E&E Waste) to ensure that all company activities are performed in a manner that minimises environmental impact in accordance with ISO14001:2015.

## Principles

E&E Waste accepts the responsibility for environmental protection which is integral to the conduct of its commercial operations.

E&E Waste is committed to:

- Operating practices which seek to minimise impacts, prevent pollution and minimise the likelihood of environmental harm through work and management practices, continual improvement, training and the use of new technology
- Compliance with all applicable environmental laws and regulations and Codes of Practice in existing operations, new developments and upgrades
- Management review of environmental objectives and targets
- Waste management to minimise wastes, develop viable recycling opportunities, and ensure proper handling and disposal methods
- Product development which seeks to combine commercial viability and efficient use and conservation of resources
- Environmental assessment of new projects, asset purchases, sales and existing operations
- Environmental Incident Response – contingency plans to minimise health, safety and environmental risks
- Rehabilitation of areas affected by business operations
- Communication of the company's environmental management procedure;
- Striving to meet Community Expectations through consultation within E&E Waste and with other relevant bodies, community groups and neighbours about environmental matters of common concern; and
- Water Management is an integral to achieving sustainability, balancing today's needs with those of the future.
